Breed of Exposure Bull: Black Angus
Expected Calving Dates: Mid February - Mid March, 2025
Exhibitor Biography: R&B Wilson Ranching Ltd. is a fourth-generation ranch located south of Prince Albert, Saskatchewan. We calve out approximately 400 Black Angus/Polled Hereford commercial cattle and maintain 80-100 replacement calves each year. All cattle are maintained on a full herd health program. Our replacement heifers are bred to low birth weight registered Black Angus bulls via natural service. Our cow herd is bred through a combination of artificial insemination and natural service to ensure we are using the best bull genetics in the industry. Our females are bred for longevity in our herd and are selected based on their structural soundness, udder quality, calving ease, maternal ability, and overall performance.

22 *Exhibited by: Rawluk Livestock, Allen Rawluk - Moosehorn, MB* Pen Weight: 0 Avg Weight: 0
Pen Number: 22C
Sire of Pen: Horned Hereford
Dam of Pen: ANGUS x SIM
Exposure Dates to Bull: April 8-May 29 (A.I. Bred May 4)
Breed of Exposure Bull: Hereford or Angus or SIm
Expected Calving Dates: Jan 13-March 5
Exhibitor Biography: Rawluk Livestock is owned and operated by Allen Rawluk in Moosehorn, Manitoba. We began in 2012 with a strict focus on producing high quality, low maintenance females to grow the herd to its current 250 mother cow base. Thru many years of single sire A.I. we have produced large groups of 3/4 sister Angus x Sim mother cows that are now used as a solid herd to breed to Horned Hereford bulls to produce daughters like this years Agribition bred heifers. These three bred heifers represent the whole 50 head bred heifer pen at home and more are for sale by private treaty if interested. Feel welcome for a visit or a phone call to discuss our operation and how these bred heifers will turn into productive long lasting cows in your herd. Allen Rawluk 204 314 0411

42 *Exhibited by: Stadnyk Farms, Shaun Stadnyk - Bruno, SK* Pen Weight: 0 Avg Weight: 0
Pen Number: 42D
Breed of Sire: Simmental
Breed of Dam: Angus
Exhibitor Biography: We are extremely excited to be a part of this years agribition week. We are a family run operation located south east of the small town of Bruno, Sk. Along with my wife Melissa, and 4 boys Graeson, Stetson, Weston and Tyson are all a huge help to the success of our operation. Our boys keeps us busy, when we aren't farming you can usually find us at the hockey rink. We are a mixed farming operation, with a grain and oilseed side, a embryo program revolving around our purebred Black Angus and Simmental herd, and a large focus on the 500+ commercial cows. We pride our operation on running functional low maintenance genetics. We believe the cattle we raise should not have to stand infront of a feed bin or feed bunk and get pampered to look good. The females get developed on a high forage ration once weaned and very little to no grain based on the year's feed availability. The females we brought to town are NOT raised on creep and have summered on dry river hills grass to northern bush pasture. Our commercial herd calves in March and April and grazes corn most of the winter right up until calving. We try to physically feed our cow herd groups less than 60 days a year. Our focus on our purebred herd is highly maternal genetics sourced from some of the best cattle operations throughout Canada and the USA. We strive to make females with extremely great udders and feet, with phenotype, fertility and production not taking a second seat. We really love the angus based cow bred Simmental, as we find these 2 breeds compliment each other extremely well in producing high preforming steers for the feedlots in the east or west and females that we believe in that will stand the test of time. Bid in confidence on these females as we have never offered a small cut of our best before and I guarantee they will last you along time and be trouble free.

33 *Exhibited by: Wadella Ranch, Wade & Justin Joorisity - Kipling, SK* Pen Weight: 0 Avg Weight: 0
Pen Number: 33C
Breed of Sire: Simmental
Breed of Dam: Simmental X
Exhibitor Biography: Wadella Ranch is located southwest of Kipling, Saskatchewan. We breed over 400 Simmental and Simmental cross females annually, which are bred back exclusively to top end red Simmental bulls. Our steers are marketed on TEAM in September and have been very well received. This is our 7th year taking part in the open heifer show and sale here at CWA. These females are sired by bulls we have selected for soundness, performance as well as maternal traits. These are the type of females we like to keep in our replacement pen and are the kind that continue to work for us. Palpated open and sound for breeding on November 12th.
